almost 32% last year to 27% this year. This is as a result of high inflation recorded over the months hitting 37.2% as at end of September. In addition the results include a significant net

exchange loss of GHS 19m due to the steep depreciation of the local currency against the USD and the EURO. These macro economics factors severely affected FML to record a negative profit of GHS 16.8m as at end of nine months September 2022.
